TRU Libraries

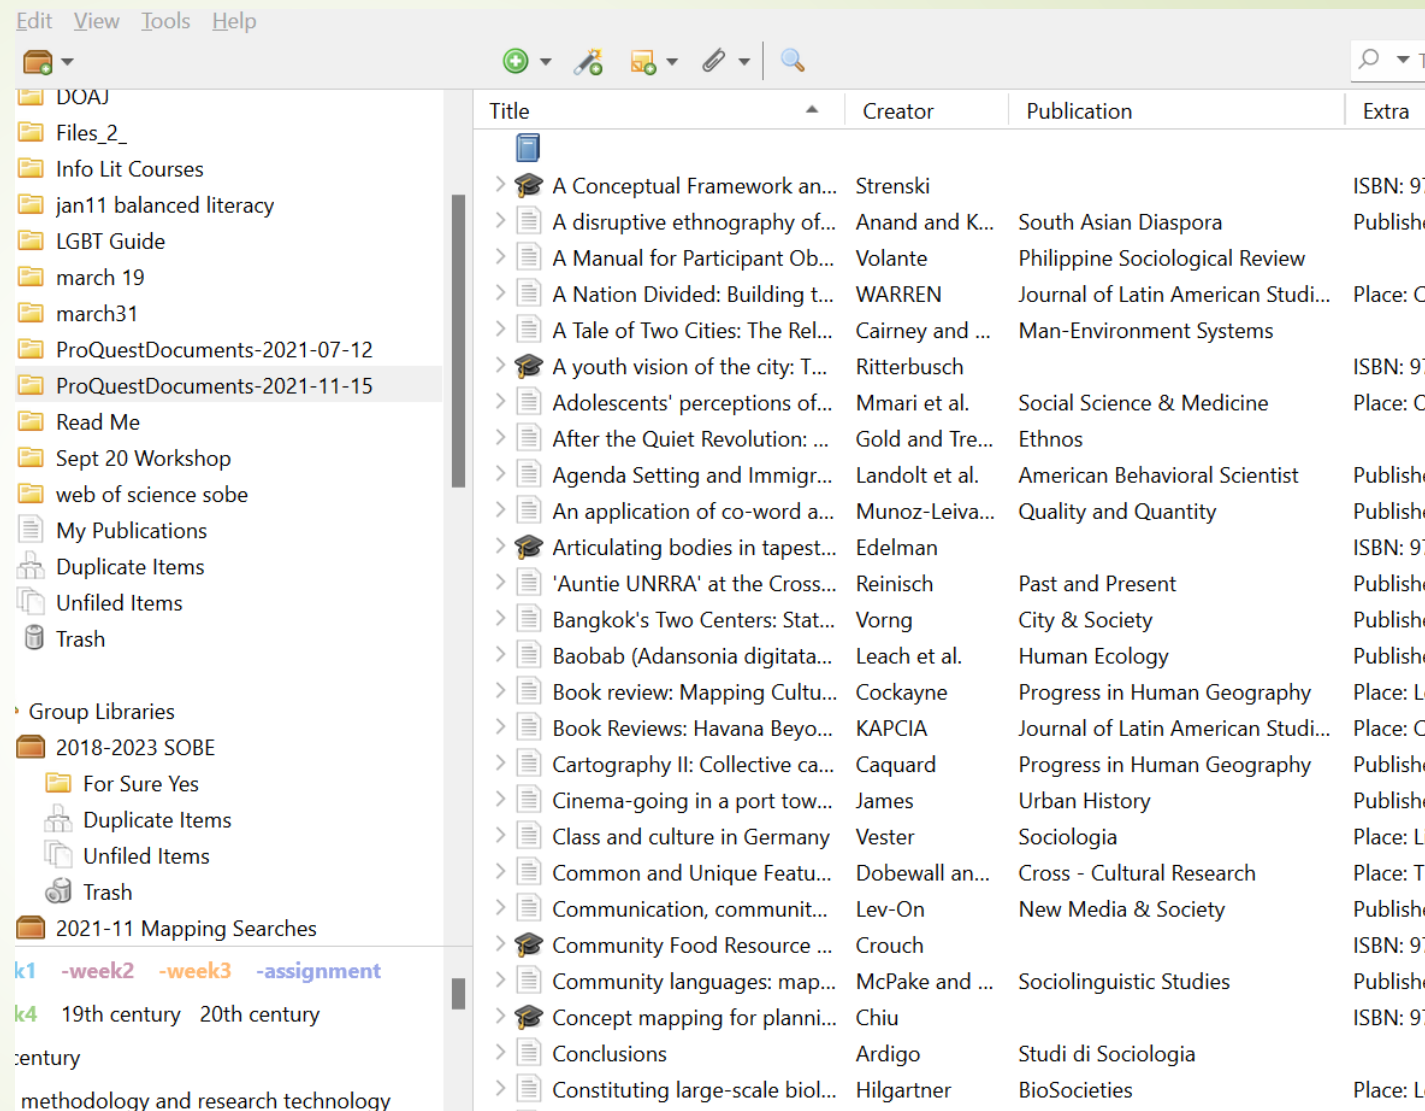

[Discover Search](#)[Course Reserves & Reading Lists](#)[Databases](#)[Journals](#)[Research Guides](#)

Search for a database by title, or browse all databases from an A-Z list.

[Browse All Databases A-Z >](#)

Citation Management

- Zotero help:
<https://libguides.tru.ca/citationmanagement/zotero>
- Useful for sharing resources among a team, categorizing resources, reference lists!
- <https://www.zotero.org/>
- Find new Zotero tutorials on the LibGuide!
- Covidence: systematic review tool
<https://support.covidence.org/help/thompson-rivers-university-library>

Open Access Discounts

Through TRU Library's membership in CRKN, there are APC discounts available to you for a handful of publishers!

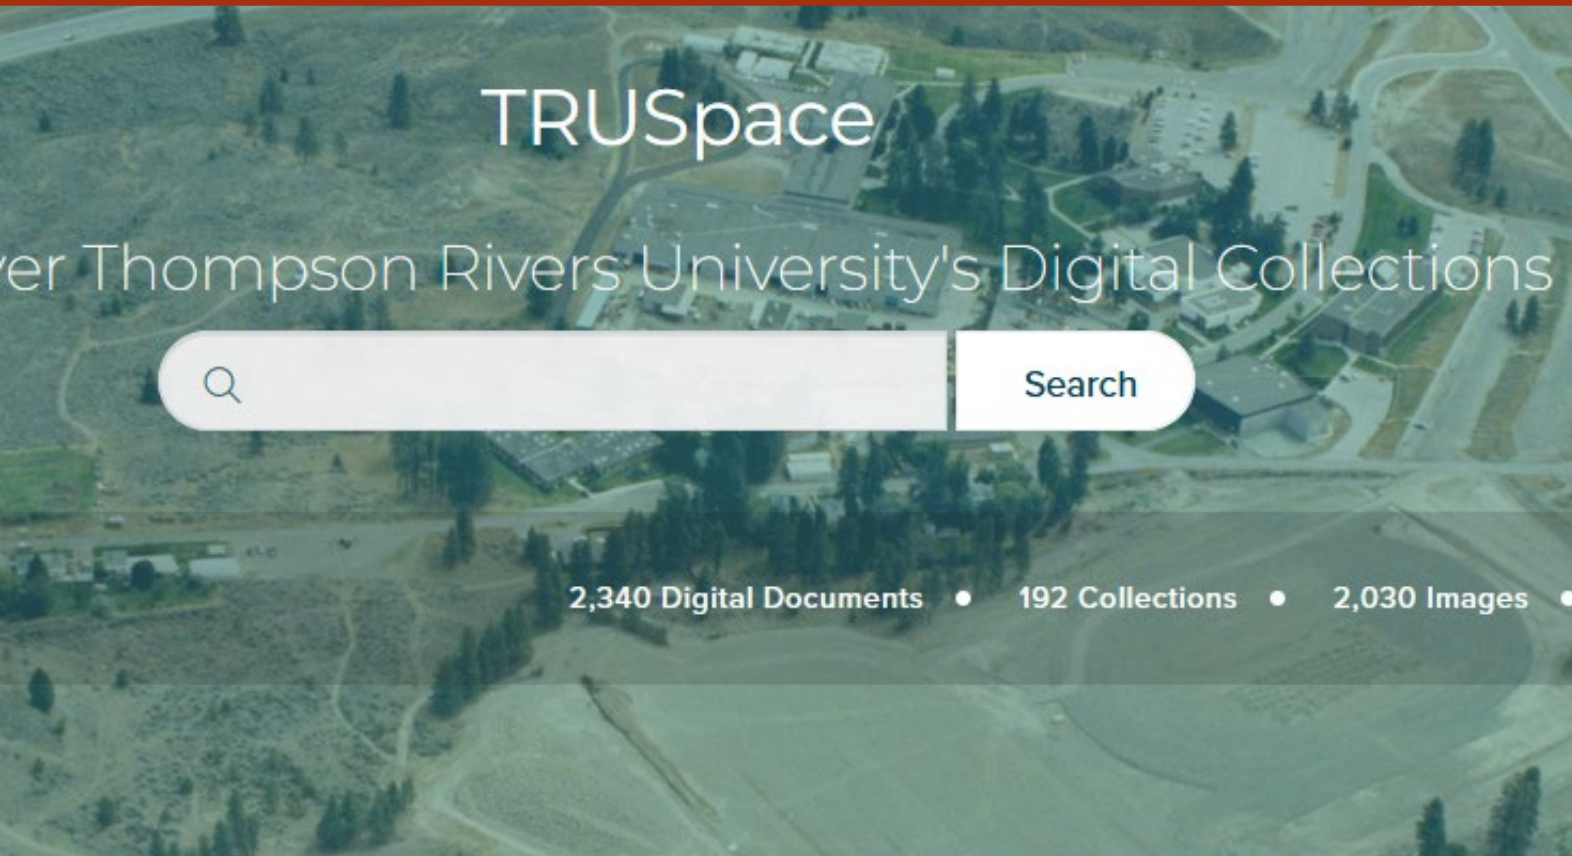

"Read and Publish:" we pay the publisher for both accessing articles, and for our researchers to publish Open Access articles

Search for journals covered by these agreements: <https://www.crkn-rcdr.ca/en/open-access-publishing>

Other Publishing Support

- TRUSpace, TRU's Institutional Repository
 - Pre-print, post-print, or publisher version
 - Meets open access requirements, can help more people read your research!
 - Student theses, capstones, other projects as well
- Many LibGuides for researchers
- Ask me! We are here to help

Research Data Management

- TRU's Research Data Management Institutional Strategy:
https://www.tru.ca/_shared/assets/data-management-institutional-strategy57413.pdf
- Depending on your grant, you may be required to have a data management plan and/or deposit your data in a data repository
- We can support with data management plan content and structure
 - DMP Assistant: <https://dmp-pgd.ca/>
- Borealis data repository:
<https://borealisdata.ca/dataverse/tru>

Sample Plan

Introductory Guidance (0 / 1) +

Data Collection (0 / 3) +

Documentation and Metadata (0 / 3) +

Storage and Backup (0 / 3) +

Planning how research data will be stored and backed up throughout and beyond a research project is critical in ensuring data security and integrity. Appropriate storage and backup not only helps protect research data from catastrophic losses (due to hardware and software failures, viruses, hackers, natural disasters, human error, etc.), but also facilitates appropriate access by current and future researchers.

What are the anticipated storage requirements for your project, in terms of storage space (in megabytes, gigabytes, terabytes, etc.) and the length of time you will be storing it?
